

# NUC E 590 SEMINAR

Nuclear Engineering

Thursday, January 17, 2008

*Seminar at 4:00 p.m.—135 Reber  
(Reception at 3:30 p.m.—hallway outside of 121 Reber)*

**Darryl Farber**

*Assistant Professor*

*Science, Technology, and Society Program*

*Penn State University*

## **Scenario Planning for Managing the Atom**

Scenario planning is a tool for strategic decision making. Organizations such as the Electric Power Research Institute, Shell Oil, Duke Energy, and the National Academy of Engineering have used scenario-based planning as a method to think systematically about possible future business and policy environments an organization may face. This seminar will introduce scenario planning and its use in nuclear power management and policy.
