

RAD DEMO is the full functioning program. However, the following input values are set at fixed values and cannot be changed: Core height (18.75 in.), core width (26 in.), fin pitch (16 fins/in.), and heat duty for sizing (100,000 Btu/hr). RAD DEMO will allow you to fully evaluate the program for your needs. You can run using either British or S.I. units. However, the above dimensions will be fixed.
